

Fiscal Year 2005 Grant Activity at GC&SU

During this past year, GC&SU faculty and staff have been active in grants work, thereby enhancing the educational experiences of all members of our community.

Grant activity increased by 100% from 2004 to 2005. Several grants workshops were also offered during the year. During Grant Week in early April, Dr. Mimi Tangum of the Grants Resource Center and Dr. Judith Skog of the National Science Foundation offered proposal development workshops and met individually with faculty and staff interested in specific grant opportunities. Throughout the year, Linda Watson Kaufman offered numerous proposal and database workshops to faculty and staff. Donna Douglas and Linda Watson Kaufman met routinely with individuals interested in grant work. Clearly, there is remarkable diversity and depth of professional involvement in grant work, and GC&SU is proud of the achievements of its faculty and staff. The Grants Development Center recognizes the following faculty and staff members who were involved in grant activity during fiscal year 2005:

Principal Investigator	Project Title
Carol Bader	PRISM Subcontract
Andrei Barkovskii (2 proposals)	Antibiotic-Resistance Genes as Trackers & Indicators Tracing Bacterial Contamination in Shellfish Harvesting Areas
Eugene Bouley and Terry Wells	Continued funding for Project Safe Neighborhood
Amy Childre	Meeting Rural Georgia Special Needs Education
Saugata Datta (2 proposals)	Assessment and Particulate Matter Characterization and Exposure Collaborative Research Proposal
Linda Irwin-DeVitis	GEAR UP
